

Darumatic

**Building better
software**

WHAT WE DO

Leverage cloud technologies

Improve your time to production

Explode productivity with containerisation

FROM OUR BACKLOG

Migrate existing applications to Kubernetes

Dockerise Java, .NET and NodeJS applications

Develop Jenkins plugins for reporting

Setup Jenkins build plans for self-service environment creation

Re-architect application to use MongoDB

Develop custom Ansible-based Kubernetes installer

Run Kubernetes administrator training

Monitor applications using Prometheus

Setup Shared-VPC in AWS

Build OpenShift cluster in London and Singapore

Develop Splunk dashboard for management

Setup centralised alerting infrastructure with Prometheus and Alertmanager

WHO WE ARE

Founded in 2017 by Adrián Deccico and Felix Schmitz. We have a combined experience of more than 25 years in the software development industry. Our experience includes setting up production Kubernetes clusters, migrating and building containerised applications and integrating CI/CD, alerting and monitoring.

High-performing IT organizations report experiencing:

200x more frequent deployments

24x faster recovery from failures

3x lower change failure rate

2,555x shorter lead times

Source - 2016 State of DevOps Report

Furthermore we have experience in developing Java enterprise software. Prior to founding Darumatic we worked for various IT companies in Australia and overseas: Atlassian, Optiver, Reserve Bank of Australia, Electronic Arts, Verizon Business, IBM, ABN Amro Clearing, Compuware and others. Our passion is to optimise your build and deployment pipeline and to promote building containerised applications which run on Kubernetes or OpenShift systems.
